序号	课程名称	课程描述
1	Computer Applications	Computer applications covers production software used in business including operating systems, word processing, spreadsheets, presentation software, desktop publishing, database, communications, and a brief introduction to computers and their impact on society. 3 credit hours
2	Understanding Korean Culture/ History	By understanding the fundamentals of Korean history and cultural values, students can understand other various cultures as well. Understanding Korean Culture and History is a survey of Korean history (from Old Choson to Modern Korea) and culture. Students will compare the Korean culture to assorted cultures from Asia, Africa, America, Europe, and Oceania. Knowing history and culture is a core requirement for students. Students will research and present how their ancestors live, work, and do business. In this course, students will analyze and evaluate Korean history and culture. Through students' activities, students will improve their global business perspectives. 3 credit hours
3	English Comprehension	The aim of this course is to improve reading, writing, and speaking skills. Students will practice reading and writing sentences and paragraphs; they will learn how to correctly use adjectives, adverbs, gerunds and infinitives correctly. The students will improve speaking skills through reading, pronunciation practice, and conversation work. Students will read basic texts and identify main ideas. 3 credit hours
4	Korean	This class is for beginner of Korea Language. This class is an introduction to the Korean alphabet and grammar for students who have never learned Korean. The class is designed to improve integrated skills of speaking, listening, reading and writing and to gain basic fluency in daily conversation. Students can perform basic language skills needed for survival such as introducing oneself, shopping, and ordering at a restaurant. Students also can comprehend and express basic, personal and familiar topics such as oneself, family, weather, etc. 3 credit hours
5	College Writing	College Writing provides students with practice in academic-level thinking and writing. Students will be required to read analytically, develop sound theories, and produce well-structured arguments. Students will be given practice in prewriting, drafting, and rewriting. This course requires 5,000 words of writing in no fewer than five writing assignments. Prerequisite: IB063 or permission of the Department Chairperson. 3 credit hours
序号	课程名称	课程描述
6	Glocal Leadership	This course introduces what is leadership and how leadership is developed. Leadership will be covered from both global and local (thus, "glocal") contexts, considering various situations and aspects of followers. 3 credit hours
7	Introduction to Writing	Introduction to Writing is designed to help students learn the Western style of academic writing. Students will learn how to develop strong paragraphs and short essays. They will learn how to brainstorm, organize, and revise an essay in English. Attention is given to improving academic writing styles, grammar, and vocabulary. 3 credit hours

8	Understanding Christianity	Understanding Christianity is an invitation to the study and experience of Christian spiritual and personal formation. It introduces and enhances the students' experience with the Christian faith through a study of the Old Testament, the revelation of God's relationship with the chosen people, the Jews, which is the background for the coming of the promised Messiah, Jesus Christ. The focus of the course will be on the metanarrative of the story of redemption and faith. 3 credit hours
9	English Grammar	This course aims at developing a student's ability to make simple oral presentations, retell simple stories, and participate in face-to-face conversations on topics going beyond the most immediate needs. Students will build on previous grammatical rules and conversation practice that was covered in the English Comprehension course. Students will increase their vocabulary and rate of fluency. Prerequisite: English Comprehension (IB059) or permission of the Department Chairperson. 3 credit hours
10	Korean Ⅱ	This course covers all aspects of pronunciation from individual sounds to intonation, rhythm, and stress. Students will work to identify and articulate vowels and consonants; produce and identify meaning change through intonation; use reduction, linking, and contractions; stress polysyllabic words correctly; understand and apply the principles of sentential stress, rhythm, and phrasing. Students can perform basic language functions such as making a phone call, asking a favor, and making a suggestion and can perform functions necessary for the use of public facilities such as post offices, banks, and hospitals. Prerequisite: Korean 1 or the permission of the Department Chairperson. 3 credit hours
11	Introduction to the Fine Arts	Introduces students to the scope of the fine arts including drama/theater, music, and visual arts. The focus will be on the classic and contemporary arts from Asia including Korea and China. Basic principles of the arts as well as a historical overview will foster an appreciation of the cultural heritage as well as the on-going contributions of East Asian fine arts. 3 credits
12	Christian Thought & Experience	Christian thought & experience will consider how contemporary Christians think about and experience their faith. It enables the students to experience the Christian faith through the writings in the new testament of the Holy Bible especially focused on the life of Christ and the early church. An overview of western Christian history will acquaint the student with the experience of Christianity throughout history and western culture. Prerequisite: Understanding Christianity (GE740) or permission of the Department Chairperson 3 credit hours
序号	课程名称	课程描述
13	Voluntary Service	Community Service-Learning is an educational approach that integrates service in the community with intentional learning activities. Within effective CSL efforts, members of both Korea Nazarene University and Cheonan community organizations work together toward outcomes that are mutually beneficial. 3 credit hours
14	Taekwondo	Taekwondo, an ancient form of unarmed combat practiced for many centuries in Korea, will enable the student to gain physical exercise while learning to develop healthy attitudes for physical well-being. 3 credit hours
15	Golf	The basic techniques and rules of golf are studied with an accompanying improvement in ability. Through learning the basic skills and competition methods for golf, ability in individual sports is developed, and the ability as a leader in school or society is improved. 3 credit hours

16	Intercultural Communication	The course examines theories of language and the role of language in culture. It emphasizes the influence of culture on the interpretation of communicative messages and skills that improve understanding in cross-cultural communication in order to provide more effective professional practices in international settings. Students will interact with persons from other cultural backgrounds for practical experience. 3 credit hours
17	Instrumental Ensemble	Instrumental Ensemble provides a cultural knowledge of music for the student. Every student will learn to play a musical instrument and read music. 3 credit hours
18	Psychology Applied to Business	Considers the different attitudes and behaviors of the work environment and the potential consequences and causes of those attitudes and behaviors. Issues surrounding motivation, commitment, stress, as well as consumer service and how theories of behaviorism, cognitivism, and social constructivism are played out in the business organization. Group dynamics and employer-employee relations may be considered. 3 credit hours
19	Introduction to Biological Anthropology	Considers human biological anthropology and its impact on global business today. Students gain understanding of the development of the human species as it relates to a cooperative species. The course will focus on the fossil records of human origin and evolution and the interaction of the human species with its environment. 3 credit hours
20	Cross Cultural Studies	In Cross-Cultural Studies, students will learn about various cultural values and norms. They will learn how to navigate certain cultural differences and how to appreciate working with people from other countries. Through the critical analysis of current events and people groups, this class prepares students to become sensitive participant-observers in today's world. 3 credit hours
21	Personal Career Development	Assists students to make the adjustment from high school to the university environment. Students assess their personal strengths and weaknesses with a focus on the career options available for the international business management student. 3 credit hours
22	Finite Math with Business Applications	Finite Mathematics with Business Applications is the introduction to finite mathematics especially focused on business and management applications. Topics include linear equations and inequalities, functions and graphs, exponential and logarithmic functions, mathematics of finance, systems of linear equations and matrices, sets and probabilities, linear programming, and others. 3 credit hours.
序号	课程名称	课程描述
23	Academic English Reading	In Academic English Reading, students will practice analyzing, synthesizing, and evaluating literary texts and themes. Students will interact with a variety of interdisciplinary and multicultural texts. Students will develop an ability to think critically about the texts and engage in meaningful class discussions. Students will learn to interpret culture, language, and the human experience through the perspective of short stories and/or poetry. 3 credit hours

24	Korean Ⅱ	This course focuses on developing students' abilities to recognize and produce vowels and consonants of Korean, to recognize and correctly interpret basic intonation patterns in a variety of sentence types, and to apply letter-to-sound rules when reading aloud. Students can understand and express one's opinion at the paragraph level on familiar social topics such as occupations, events, nations, cultures, etc. as well as familiar personal topics. Prerequisite: Korean 2 or the permission of the Department Chairperson. 3 credit hours
25	Principles of Macroeconomics	Principles of Macroeconomics will introduce students to the various theories and principles in the analysis of economic growth particularly in the determination of the levels of price, income, output, and employment. A close examination on the effectiveness of discretionary fiscal and monetary policies as well as issues arising from globalization and recent financial crisis shall be undertaken. Prerequisite: IB013 or permission of the Department Chairperson. 3 credit hours
26	Business Statistics	Business Statistics teaches introductory statistics applicable to business. Topics include English statistical terminology, descriptive statistics, normal distribution, and hypothesis testing using inferential statistics including t-tests, ANOVA and other appropriate measures. The course uses computer technology for statistical calculations. Prerequisite: Finite Math with Business Applications (IB017) or the permission of the Department Chairperson. 3 credit hours.
27	Managerial Accounting	Managerial Accounting is a study of accounting concepts for manufacturing operations. Accounting techniques focus on such items as cost concepts, cost behavior, break even analysis, budgeting, variance analysis, short-term decision making, and pricing issues. Prerequisite: Financial Accounting (IB026) or permission of the Department Chairperson. 3 credit hours
28	Human Resources Management	This course offers students the opportunity to explore the role played by managers and supervisors in the successful management of the organization's human resources (HR) and examine the evolving human resources function within today's organizations. The course also investigates how HR is influenced by culture, Ethics, and how different regions approach HR management in different areas. In the end, students learn how an organization employ, train, compensate, rewards, motivates, uses, and generally manages its people effectively and improving their performance, and rewarding employee successes. 3 credit hours
序号	课程名称	课程描述

29	Business in Emerging Nations	As the phenomenon of globalization continues to define how the world operates, it is important to take a closer look on countries considered as emerging markets. This course is designed to provide students, pursuing an international career in business management, with a deeper understanding of the emerging markets' environment (economic, political, legal, socio-cultural). Also, the course shall examine the various opportunities and trends offered by emerging markets. Discussions on the various issues, challenges and risks in doing business in emerging markets will be tackled. Previous knowledge of the students (economic models, concepts and theories) on business shall be applied in the context of emerging markets. 3 credit hours
30	International Business Management	The course will provide students the needed understanding in managing business in an international context, particularly of multinational firms. The course is also designed to examine the decision making processes involved to ensure successful and effective business operation in the global market. Students will be ushered to examine strategic issues and challenges facing businesses with cross-border operations, and how these are addressed. 3 credit hours
31	International Trade	The course shall introduce the basic concepts, theories and models involving international trade. It shall cover the role and patterns of international trade that shape the global economic environment. Discussions will include the various models and how these can be used as tools in analyzing international trade policies and issues. The course shall attempt to situate these models into the current international trade policies implemented by various countries in the world. 3 credit hours
32	Introduction to Business	Introduction to Business will introduce what a business is, how business operates and how it is managed. This course is designed to introduce the student to basic business terminology and concepts.
